- Download Audio
- Download Video
- Download Shorts
- Download Full Playlist Audio
- Download Full Playlist Video
- Not server based
- Privacy is unbreakable
- Download Notifications
- Separate folder for downloads
- Error Handling
- Bulk downloading from Text file(windows exclusive)

THE USER GUIDE

» Ensure Valid YouTube link:

- 1) The video link should be publicly available in YouTube at the time of downloading.
- 2) The video link should be available in your country.
- 3) Video should not be live.
- 4) Playlist shouldn't be Mix/YouTube Autogenerated playlist.

» Use correct link:

- 1) Use (<https://www.youtube.com/watch?v=zzzzzzzzzzzz>) type link for single audio and single video downloads.
- 2) Use

(<https://www.youtube.com/watch?v=zzzzzzzzzzzz&list=PLyyyyyyyyyyyyyyyyyyyyyyyyyyyyyy>) type link for full playlist audio and full playlist video downloads. (There should be "&list" written in the link)

- 3) Use (D:/abc/textfile.txt) for list in text files. Use full textfile address and the textfile should have a file extension of ".txt".

» Download Directory:

- 1) For single files - YourTube_Downloads in your Downloads folder
- 2) For playlists - A new folder named after the playlist and the type you download(audio/video) will be created under YourTube_Downloads and the audios/videos will be saved in that folder.
- 3) For text file list downloads - A new folder named after the text file and the type you download(audio/video) will be created under YourTube_Downloads and the audios/videos will be saved in that folder.

» Text file list Download Instructions:

- 1) Create a text file(extension - ".txt") via notepad or any text editor application.
- 2) Be careful with the naming as the name of the text file will be the folder in which the files will be downloaded. The name must be unique.
- 3) With no spaces, paste the first link.
- 4) For every new link, paste that in new line with no spaces before or after.
- 5) The file should only contain links of youtube.
- 6) Invalid links will be skipped.

» If app crashes:

Windows:-

- 1) Check Internet Connection.

- 2) Check if any program is clashing with YouTube Downloader or not.
 - 3) Check Microsoft Defender. (Disable it if causing problems, Its rare)
 - 4) Run with Administrator Mode.
 - 5) Check Storage space.
 - 6) Check for updates of this app.
 - 7) If still can't find, Report problem or screenshot any errors to Intense Support.
- If need any help or concern, contact Intense Support at [Intense Support \(Telegram\)](#).
